

COMMUNITY THERMAL IMAGING PROJECT

Helping You Keep Your Warmth In

Mutford Parish Council has booked a thermal imaging camera for free with access to it for **the period 29th January to 11th March 2025.**

Our aim is to raise awareness about insulation and help you improve the energy efficiency of your home. This could mean:

- ❖ a reduction in fuel bills
- ❖ warmer homes
- ❖ reducing your carbon emissions

What can you learn from a thermal imaging survey?

If your house is relatively new, already has insulated cavity walls and double glazing and feels warm – you might not learn much, except to get an even warmer glow after confirming your house is well insulated!

If your house is older and seems difficult to keep warm - you might learn exactly where the heat is escaping and get some ideas about where to insulate. A thermal imaging survey might:

- ❖ identify places which might have draughts
- ❖ detect whether cavity wall insulation is patchy or missing
- ❖ detect areas with less loft insulation

If you would like to receive a free thermal survey of your home, please contact:

Angela Colbridge, Mutford Parish Council Clerk, via e-mail at: clerk.mutfordpc@outlook.com or

by phone on: 07584 136402

The cameras use infra-red radiation which **cannot** pass through glass. This means the camera cannot see through windows, doors or walls. A thermal imaging survey will not invade your privacy as we will only see the outside surface of your house.

The Thermal Imaging Project is funded by the Suffolk Climate Change Partnership which brings all Suffolk councils together to better equip Suffolk for our changing climate.
